Koan Plus by Kokaistudios, 2021

A configurable system of fixed and sliding panels, Koan Plus is an evolution of traditional Asian room partitions, the design made up of timber, glass in a variety of shades and aluminium detailing. Oak or walnut slats are positioned horizontally, vertically, or a configuration of both, artistically intersecting to make a geometric design that shifts as the panel moves. An object of beauty and warmth, Koan Plus is delightfully uncomplicated yet visually captivating – a combination that never loses appeal. lualdiporte.com ➤
